WYNN'S THROTTLE BODY CLEANER

ADVANTAGES

Wynn's Throttle Body Cleaner can be used either in conjunction with regularly scheduled engine tune ups, or on its own. It will restore fuel related vehicle driveability performance, power and acceleration performance, low emissions, optimal fuel economy, and lower octane requirement to improve customer satisfaction.

Wynn's Throttle Body Cleaner cleans away gum and varnish for smoother idling. Lubricates computer-controlled air-intake system components and protects against rust and corrosion. Restores lost fuel efficiency from throttle plate deposits.

APPLICATIONS

Wynn's Throttle Body Cleaner is formulated for use with Wynn's FuelSystemSERVE®+ (Product No. 68432), utilising the Wynn's Throttle Body Cleaning Tool (Part No. 31500) as directed in the equipment manual.

DIRECTIONS FOR USE

The chemical is put into the Wynn's FuelSystemSERVE®+ tank, which is to be connected to the intake manifold via Wynn's Throttle Body Cleaning Tool (part no. 31500) before the throttle plate.

Start the engine, and when the engine is running, turn on the Wynn's FuelSystemSERVE®+ and operate as per instruction manual. The chemical will be then atomised and sprayed into the air intake manifold. The chemical will clean the throttle plate and the intake manifold as the engine is running. Some chemical will wrap around the throttle plate to help cleaning the back side of the plate but it is normal that some carbon will be left behind.

Do not apply Wynn's Throttle Body Cleaner on painted surfaces. If accidentally applied on paint, wash off immediately with water. Avoid prolonged contact with rubber and plastic components.

Do not use or store Wynn's Throttle Body Cleaner near sparks, heat, or open flames. Keep area ventilated during use.

BENEFITS

Wynn's Throttle Body Cleaner is formulated to provide the following benefits:

- 01 Cleans air throttle plates and throttle plate shafts.
- 02 Safely dissolves away gum and varnish deposits.
- 03 Improves air flow for smoother idling.
- 04 Improves fuel economy and helps restore lost power.
- 05 Protects against rust and corrosion.
- 06 Reduces engine knock and run-on.
- 07 Reduces exhaust emissions and octane requirement.
- 08 Safe for oxygen sensors and catalytic converters.
