

WYNN'S ENVIRO PETROL TREATMENT (EPT)

PROFESSIONAL RANGE

ABOUT THE PRODUCT

Wynn's Enviro Petrol Treatment (EPT) is a premium fuel treatment that is ideal for bulk petrol fuel storage. It keeps fuel fresh for up to 24 months, kills harmful bacteria, and reduces water entrainment.

The data concerning properties and applications of the indicated products are offered in good faith and are based on our research and practical experiences. Due to the versatility of the application possibilities, it is impossible to mention all details and we do not assume any obligations or responsibilities resulting from this. When a new edition appears due to the technical development, the preceding data are no longer valid.

**WYNN'S ENVIRO PETROL TREATMENT (EPT)****ADVANTAGES**

Wynn's EPT has been formulated to provide an effective solution to the problems of bulk petrol fuel storage, which left unchecked overtime can lead to reduced engine performance.

Wynn's EPT can be added directly to a vehicle's petrol tank to enhance the wear protection of fuel system components, particularly injector pumps or for maximum injector clean-up.

BENEFITS

Wynn's EPT has been formulated to provide the following benefits:

- 01 Cleans injectors and keeps them clean
- 02 Adds lubricity
- 03 Reduces emissions
- 04 Improves fuel economy
- 05 Kills harmful bacteria, yeast and fungi
- 06 Reduces water entrainment and prevents stable emulsion formation
- 07 Keeps fuel fresh for up to 24 months
- 08 Protects against corrosion
- 09 Suitable for use in ethanol blends
- 10 Removes water from fuel
- 11 Safe for use with oxygen sensors, and common emission control measures including catalytic converters

DIRECTIONS OF USE

For fuel storage or regular use:

Add 1 litre of Wynn's EPT to 2000 litres of petrol. Dosage rate may be increased periodically to obtain optimum results. Application rate may be varied, and is dependent on the condition of the delivered fuel and the environment of the storage tank. Treat rates can vary from 1:400 for heavily bacteria/algae/water infested fuel to 1:2000 for maintaining a clean system.

For initial treatment or in-tank clean-up of a vehicle's fuel system: treat at 1:400. Preferably add Wynn's EPT prior to refilling bulk tanks to thoroughly mix. No additional mixing of Wynn's Enviro Petrol Treatment is required. After adding Wynn's Enviro Petrol Treatment, filter blockage may result initially from the removal of existing sludge and dead algae. Regular filter inspections are suggested to monitor any build-up.

APPLICATIONS

Wynn's EPT is suitable for use in all types of petrol engines and fuel grades. It is suitable for engines in trucks, tractors, buses and generators, and particularly recommended for marine engines such as fishing boats and pleasure craft.
