

## WYNN'S FRICTION PROOFING

PROFESSIONAL RANGE

### ABOUT THE PRODUCT

Wynn's Friction Proofing is an engine lubricant supplement that improves oxidation resistance, corrosion control, and engine cleanliness while reducing friction wherever metal-to-metal contact occurs.

Product Number	Pack Size	Carton Qty.
61810	325mL	24

The data concerning properties and applications of the indicated products are offered in good faith and are based on our research and practical experiences. Due to the versatility of the application possibilities, it is impossible to mention all details and we do not assume any obligations or responsibilities resulting from this. When a new edition appears due to the technical development, the preceding data are no longer valid.

## ADVANTAGES

Wynn's Friction Proofing is formulated to help reduce friction and wear. It's unique combination of polymers, oxidation inhibitors, anti-wear additives and detergents retards the oxidation and breakdown of the motor oil at high engine operating temperatures. It provides a cushion between worn parts, helping to reduce engine noises and wear.

Wynn's Friction Proofing controls oil thickening resulting from oxidation during periods of severe high-speed operation, reducing the possibility of oil thickening and loss of lubrication.

Wynn's Friction Proofing helps maintain engine cleanliness by reducing the formation of lacquer and varnish deposits, helping to insure proper lubricant flow and mechanical component operation.

## BENEFITS

Wynn's Friction Proofing has been designed to:

- 01 Reduce friction and wear
- 02 Prolong oil life
- 03 Penetrate and bond to metal surfaces
- 04 Reduce engine sludge and varnish build up
- 05 Protect engines at start-up and extreme conditions
- 06 Improve oil performance during extended oil drain intervals
- 07 Reduce oil oxidation and thickening
- 08 Increase rust and corrosion protection
- 09 Reduce oil screen clogging

## DIRECTIONS OF USE

Add entire contents Wynn's Friction Proofing directly to the engine oil, with the engine turned off.

## APPLICATIONS

Wynn's Friction Proofing is suitable for all petrol, LPG and diesel engines. It is compatible with all commercial engine oils and is ideal for all normally aspirated or turbocharged engines. Wynn's Friction Proofing is designed to be a multi-purpose crankcase additive that can be used in new and old engines.
