WYNN'S TRANSERVE® AUTOMATIC TRANSMISSION FLUSH AND FILL MACHINE

PROFESSIONAL RANGE

ADVANTAGES

Wynn's TranSERVE® Automatic Transmission Flush and Fill Machine utilising the Wynn's Automatic Transmission Flush Kit (Product No. 10210) has a high exchange rate of up to 90% compared to only 50% with a classic drain and fill. There is no mixing of old and new fluid, and it has an easy connection to the transmission or transmission oil cooler lines.

Wynn's TranSERVE® Automatic Transmission Flush and Fill Machine operates on the vehicle's battery (12V) and automatically detects the correct flow direction.

Wynn's TranSERVE® Automatic Transmission Flush and Fill Machine has 4 different functions, including ATF exchange, ATF top up, ATF drain and adding additive.

BENEFITS

Wynn's TranSERVE® Automatic Transmission Flush and Fill Machine has been designed to provide the following benefits:

- 01 Clean & removes sludge, contaminants & exhausted fluid from the transmission, torque converter & cooler
- 02 Automatic flow rectifier directs flow to/from transmission automatically
- 03 Automatically adds the same amount of new ATF as is removed from the vehicle, without monitoring or adjustments
- 04 Enables lowering of pan level for safer transmission filter service
- 05 Easy fluid makeup or product injection using additive tank
- 06 Drip-less quick-connect adaptors to fit most applications

DIRECTIONS OF USE

Refer to Wynn's TranSERVE® Automatic Transmission Flush and Fill Machine's operating manual.

APPLICATIONS

Wynn's TranSERVE® Automatic Transmission Flush and Fill Machine is recommended when changing ATF of automatic gearboxes or when experiencing shifting problems, fluctuating RPM or not retaining the correct gear.

Wynn's TranSERVE® Automatic Transmission Flush and Fill Machine is suitable for all types of cars with automatic gearboxes.

Wynn's TranSERVE® Automatic Transmission Flush and Fill Machine is not to be used on high-pressure systems of buses, trucks, bulldozers, etc.
