The data concerning properties and applications of the indicated products are offered in good faith and are based on our research and practical experiences. Due to the versatility of the application possibilities, it is impossible to mention all details and we do not assume any obligations or responsibilities resulting from this. When a new edition appears due to the technical development, the preceding data are no longer valid.

ADVANTAGES

Wynn's Hi-Temp Bearing Grease can be used for complete plant lubrication on both anti friction and plain bearings operating in harsh conditions such as high loads, wet and dusty environments.

BENEFITS

Wynn's Hi-Temp Bearing Grease is formulated to provide the following benefits:

- 01 Extended lubrication periods
- 02 Good adhesive properties
- 03 High load carrying capacity
- 04 Temperature range up to 180°C continuous and 200°C intermittently

DIRECTIONS OF USE

Wynn's Hi-Temp Bearing Grease may be applied either manually or by automatic greasing systems designed to pump an NLGI No. 2 grease. It is always good practice not to mix varied brands and types of greases. If the type of grease is unknown the area to be lubricated should be cleaned or purged prior to application.

APPLICATIONS

Wynn's Hi-Temp Bearing Grease is suitable for electric motor bearings, conveyor roller bearings, pump bearings, crushing and screening plants, automotive wheel bearings and general plant greasing.
