

ABOUT THE PRODUCT

Wynn's Multifleet Grease, containing the unique Wynn's Friction Proofing® package, is formulated to NLGI Grade No. 3 consistency for heavy-duty and extreme-pressure applications within the transport, earthmoving, marine, rural and mining industries. Wynn's Multifleet Grease is a lithium soap thickened grease that provides high adhesion, water wash resistance, extreme shock load protection, high thermal and oxidation stability.

Product Number	Pack Size	Carton Qty.
51045	450g	20
51020	20kg	1

ADVANTAGES

Wynn's Multifleet Grease, fortified with Wynn's Friction Proofing® has a unique ability to withstand extreme pressure and shock loading while providing superior wear protection. It resists hammering, sling-out and throw-off, and displays extremely good water wash-out and humidity resistance.

BENEFITS

Wynn's Multifleet Grease is formulated for extreme pressure and wear protection to provide the following benefits:

- 01 Protects all moving parts from shock loadings
- 02 Prevents scuffing and reduces wear
- 03 Extended ball joint life
- 04 High shear stability
- 05 Very high thermal and oxidation stability under severe conditions
- 06 Broad operation in high and low temperature applications
- 07 Maintains grease consistency for extended lubrication service

DIRECTIONS OF USE

Wynn's Multifleet Grease may be applied either manually or by automatic greasing systems designed to pump an NLGI No. 3 grease. It is good practice not to mix varied brands and types of greases. If the type of grease is unknown, the area to be lubricated should be cleaned or purged prior to application.

APPLICATIONS

Wynn's Multifleet Grease is suitable for rural, mining and marine use, including tractors, pumps, mowers, harvesters, trucks, trailers, tillers, seeders, deck winches, drill rigs, excavators, shovels, dump trucks, jaw crushers, conveyors, and dozers. It is also suitable for shackles, torsion bars, universal joints, brake arms, turntables, general chassis points, bucket pins, slides, cams and gears.

Wynn's Multifleet Grease is compatible with most lithium soap thickened greases, however for best results, removing the old grease prior to filling is recommended.
