The data concerning properties and applications of the indicated products are offered in good faith and are based on our research and practical experiences. Due to the versatility of the application possibilities, it is impossible to mention all details and we do not assume any obligations or responsibilities resulting from this. When a new edition appears due to the technical development, the preceding data are no longer valid.

## WYNN'S PURPLE POWER

### ADVANTAGES

Wynn's Purple Power is a strong detergent compound designed to remove stubborn oils, fats and greases from all hard surfaces. It also removes deposits from cargo storage tanks, and pipe lines for marine and land based installations.

### BENEFITS

Wynn's Purple Power has been designed to provide the following benefits:

- 01 Is soluble in both fresh and salt water
- 02 When used with hot water, effectively removes petroleum oils and greases, animal and vegetable oils

### DIRECTIONS OF USE

For general surface cleaning such as removing deposits from bitumen, cement, steel plates or wood: Use Wynn's Purple Power neat or diluted up to 1:5 with water depending on situation. Best results are achieved by diluting with hot water.

For steam cleaning & pressure cleaning, dilute 1:20 to 1:50 for use as a heavy duty steam or pressure cleaner.

For circulation in open or closed systems, dilute Wynn's Purple Power 1:30 with water and circulate through pipe work for 3 to 6 hours; the temperature of the system should be 60-70° C.

For machine washing of tanks through Butterworth or similar recirculation spray equipment, refer to your Wynn's Technician for advice. Generally, dilution will be as follows: Semi Drying Oils : 0.3% solution at 60-70° C. Drying Oils : 0.5% solution at 60-70° C.

For alloy wheels, wet first with cold water from hose. Spray undiluted Wynn's Purple Power onto wheels and hose off with cold water after 2-3 minutes. Do not apply Wynn's Purple Power on hot surfaces or in the sun, as whitening of the alloy metal may occur. Do not use aluminum component spraying equipment or spray onto painted surfaces.

Wynn's Purple Power does not contain caustic soda. It is formulated with Sodium Metasilicate to give the cleaned surface a bright shining luster. Sodium Metasilicate will corrode pure aluminum, tin and zinc, but not aluminum alloys.

### APPLICATIONS

Wynn's Purple Power is suitable for general surface cleaning, steam cleaning and pressure cleaning and for cargo and storage tanks and alloy wheels. It can be used neat or diluted with hot or cold water depending on application. It also can be used through a pressure spray and steam cleaning equipment.
