

WYNN'S DIESEL INDUCTION FLUSH KIT

ABOUT THE PRODUCT

Wynn's Diesel Induction Flush Kit, containing Wynn's Diesel Induction System Cleaner and Wynn's Turbo & DPF Cleaner & Regenerator, has been developed to clean the entire induction system from the air box through to the exhaust.

Product Number	Pack Size	Carton Qty.
10390	Twin Pack (2 x 325ml)	12

ADVANTAGES

Wynn's Diesel Induction System Cleaner (Product No. 23480) provides immediate thorough cleaning of air intake system and inlet valves, and dissolves gum, lacquer and carbon deposits.

Wynn's Turbo & DPF Cleaner & Regenerator (Product No. 31592) reduces carbon deposit decomposition (burning) temperatures to 450°C to 500°C. This allows for DPF regeneration at lower driving speeds, reducing DPF blocking in city driving cycles. Wynn's Turbo & DPF Cleaner & Regenerator will also clean the Turbo as it flows through the exhaust pipeline to get to the DPF.

**WYNN'S DIESEL INDUCTION FLUSH KIT****BENEFITS**

Wynn's Diesel Induction Flush Kit is designed to provide the following benefits:

- 01 Smooth idling
- 02 Eliminates knocking
- 03 Easily cleans and regenerates a blocked diesel soot filter without dismantling
- 04 Catalyst for optimised combustion and decreased soot build-up
- 05 Reduces the combustion temperature of soot so that the soot particles burn faster and at a lower temperature
- 06 Restores engine power
- 07 Avoids frequent maintenance costs related to the manual regeneration of the blocked soot filter
- 08 Especially suited for city driving cycles
- 09 Can be used in combination with built-in regeneration systems
- 10 Has a cleaning effect on the exhaust side of the turbo

DIRECTIONS OF USE

Wynn's Diesel Induction System Cleaner (Product No. 23480) is put into the Wynn's FuelSystemSERVE®+ tank, which is to be connected to the intake manifold via Wynn's Throttle Body Cleaning Tool (part no. 31500) before the throttle plate.

Start the engine, and when the engine is running, turn on the Wynn's FuelSystemSERVE®+ and operate as per instruction manual. The chemical will be then atomised and sprayed into the air intake manifold. The chemical will clean the intake manifold as the engine is running.

Do not apply Wynn's Diesel Induction System Cleaner on painted surfaces. If accidentally applied on paint, wash off immediately with water. Avoid prolonged contact with rubber and plastic components.

note: do not use or store Wynn's Diesel Induction System Cleaner near sparks, heat, or open flames. Keep area ventilated during use. To use Wynn's Turbo & DPF Cleaner & Regenerator, add 325ml bottle to partially empty diesel fuel tank and top up with diesel. Use every 3rd tank or 3,000km.

APPLICATIONS

Wynn's Diesel Induction System Cleaner (Product No. 23480) is formulated for use with Wynn's FuelSystemSERVE®+ (Product No. 68432) as directed in the equipment manual. It is recommended to be used at each service interval or as required to maintain cleanliness. This can be achieved while the components are in place.

Wynn's Turbo & DPF Cleaner & Regenerator (Product No. 31592) is suitable for diesel engines with all types of diesel particulate filter. It is also suitable for diesel and biodiesel up to B30.
