

ABOUT THE PRODUCT

Wynn's Radiator Treatment radiator coolant concentrate that has been developed to protect car, light duty truck and fluid cooled motorcycle engines from damage caused by heat and corrosion. It can be safely used on both ferrous and aluminium parts including alloy water pumps.

The data concerning properties and applications of the indicated products are offered in good faith and are based on our research and practical experiences. Due to the versatility of the application possibilities, it is impossible to mention all details and we do not assume any obligations or responsibilities resulting from this. When a new edition appears due to the technical development, the preceding data are no longer valid.

ADVANTAGES

Wynn's Radiator Treatment is a concentrated solution of corrosion inhibitors, anti-foam agents and anti-scale compounds that provides excellent protection for modern cooling systems.

Wynn's Radiator Treatment contains highly effective corrosion inhibitors that significantly reduce rust and the corrosion of metals used in cooling systems, well below the figures established by ASTM Specifications.

Wynn's Radiator Treatment prevents scale deposits by using special compounds that prevent scale deposits from forming and clogging radiators and other vital components of cooling systems.

BENEFITS

Wynn's Radiator Treatment provides the following benefits:

- 01 Protects aluminium, alloy and cast iron against corrosion
- 02 Combats harmful electrolysis
- 03 Protects all cooling system parts against rust corrosion and scale formation
- 04 Extends corrosion protection of cooling systems
- 05 Prevents erosion corrosion of alloy water pumps and cylinder walls
- 06 Prolongs cooling system life

DIRECTIONS OF USE

Shake bottle well before use. Drain and thoroughly flush the cooling system with clean distilled water. Use Wynn's Radiator Flush (Product No. 65010) if the system is dirty. Close all drain plugs and partly fill the system with clean water. Add Wynn's Radiator treatment at a rate of 1:20 with water to the cooling system. Run system with radiator cap off for 15 minutes. Stop engine and top-up radiator as required. Follow air-bleeding procedures as per vehicle manufacturer's instructions. Check for leaks. To prevent and stop leaks, use Wynn's Radiator Stop Leak. If product is accidentally spilled on paintwork, wash immediately with fresh water.

APPLICATIONS

Wynn's Radiator Treatment is suitable for use in the cooling systems of petrol and light duty diesel engines.

Wynn's Radiator Treatment meets the requirements of the Australian / New Zealand Standard AS/NZS 2108.1:2004 for Engine Coolant Type B.

Wynn's Radiator Treatment is a "TYPE B" coolant concentrate.
