

WYNN'S THROTTLE BODY & CARBY CLEANER

ABOUT THE PRODUCT

Wynn's Throttle Body & Carby Cleaner is professionally formulated to safely remove gum and varnish from air throttle plates and throttle plate shafts.

Wynn's Throttle Body & Carby Cleaner helps restore engine performance, by quickly removing gums and varnishes from the carburettor and restoring carburettor efficiency without the need to dismantle.

ADVANTAGES

Wynn's Throttle Body & Carby Cleaner cleans away gum and varnish for smoother idling. It lubricates computer controlled air-intake system components and protects against rust and corrosion.

Wynn's Throttle Body & Carby Cleaner cleans valves on direct application to help correct rough idling and deposit caused stalling.

WYNN'S THROTTLE BODY & CARBY CLEANER

BENEFITS

Wynn's Throttle Body & Carby Cleaner provides the following benefits:

- 01 Cleans air throttle plates and throttle plate shafts
- 02 Safely blasts away gum and varnish deposits
- 03 Improves air flow for smoother idling
- 04 Restores fuel economy
- 05 Protects against rust and corrosion
- 06 Dissolves and removes external and internal carburettor deposits
- 07 Restores proper carburettor operation and efficiency
- 08 Frees sticking automatic choke assemblies
- 09 Cleans positive crankcase ventilating valves on direct application
- 10 Contains no CFC's which have been proven to be harmful to the ozone layer
- 11 Safe for oxygen sensors and catalytic converters

DIRECTIONS OF USE

Shake Wynn's Throttle Body & Carby Cleaner can well before use. Run engine to normal operating temperature. Turn off engine.

For throttle body applications, disconnect air intake duct tube from throttle body. Place rag under throttle body to collect cleaner run-off. Spray into air intake throat, working throttle butterfly back and forth. Remove rag and start engine. Spray into the throttle body using short sprays while engine is idling. Turn off engine and replace air inlet duct. Drive vehicle immediately.

For carburettor applications, remove air cleaner from carburettor. Spray all exposed surfaces in the carburettor and air horn assembly. Start engine. Spray into float chamber vent whilst revving the engine. Stop engine. Spray the exterior of the carburettor. Replace the air cleaner. The aerosol can of Wynn's Throttle Body & Carby Cleaner is fitted with an upside-down spray valve. To apply the product in the upside down position, do not invert the aerosol can whilst spraying. To activate the spray valve for the inverted position, firstly stop spraying, invert the can and then commence spraying after a few seconds in the inverted position.

Do not spray Wynn's Throttle Body & Carby Cleaner on painted surfaces. If accidentally sprayed on paint, wash off immediately with water. Avoid prolonged contact with rubber and plastic components. Do not spray or store Wynn's Throttle Body & Carby Cleaner near sparks, heat, or open flames. Keep area ventilated during use.

APPLICATIONS

Wynn's Throttle Body & Carby Cleaner is ideal for cars, trucks, tractors, earthmoving equipment and farm machinery. It is recommended for removal of fuel system deposits found on: intake valves; fuel injectors; air intake systems; manifolds; combustion chambers; and throttle bodies. It also works on carburettors, automatic chokes and positive crankcase ventilator (PCV) valves, in all two and four cycle petrol engines.
